- SUGGESTIONS/ANALYSIS:**
- Approx 81% Stop Time along with Driving Errors in 7 Days of work reduces the effectiveness of the Vehicle.
 - Driver Performance & Exceptional Errors should be focused in detail to maintain the Vehicles Performance particularly Speed Violations.
 - 38% of the total driving is done during the Private Hours which increases the Vehicle Usage & thus decreasing the long term efficiency of the Vehicle.
 - Based on the WORK DONE Comparison, both vehicles have been utilized less for business purposes.
